Dear Hiring Manager,

I am writing to express my interest in UI-UX Designer within your organization. With more than 16 years of experience in web design, front-end development, usability, web production, deployment, and ongoing website maintenance, I bring a combination of strong visual design skills, hands-on technical expertise, and end-to-end project ownership.

In my current role as a Senior Web Developer with Tas Technologies, Canada (remote), I work with clients across industries including healthcare, hospitality, banquet venues, logistics, food services, and other service-based businesses. My responsibilities include understanding client requirements, planning page structures and user journeys, designing responsive interfaces, implementing front-end and CMS solutions, conducting usability testing, deploying websites, and supporting ongoing improvements.

Throughout my career, I have worked across the complete website lifecycle—from client discovery and requirements gathering through design, development, testing, deployment, troubleshooting, and maintenance. My technical experience includes HTML, CSS, JavaScript, jQuery, Tailwind CSS, PHP, MySQL, WordPress/CMS environments, Figma, Adobe Photoshop, Adobe InDesign, and other Adobe Creative Suite tools.

My approach to web design is strongly user-centered. I focus on creating interfaces that are visually polished, responsive, accessible, easy to navigate, and aligned with the client's business goals. I am also experienced in user research, workflow analysis, rapid prototyping, usability testing, production troubleshooting, hosting management, and website maintenance.

Thank you for considering my application. I would be pleased to discuss how my experience and portfolio align with your requirements.

Sincerely,

Suganya Arunkumar

Senior Web Developer | UI/UX | Front-End | Web Production

Bengaluru, India
